

EDUCATION

- **Army Institute of Technology** Pune
Bachelor of Engineering 2022-2026
- **Army Public School** Chandimandir
CBSE; Result: 8.9 CGPA 2019 – 2021

EXPERIENCE

- **Website Contributor, AITMUN:**
 - * Developed a user-friendly, accessible website for AITMUN with a responsive theme using React.js and Tailwind CSS.
 - * Integrated MongoDB and Express for the backend, enabling efficient data handling and smooth user interaction.
- **Joint Secretary, Drama, Debate, and Quiz (DDQ) Club:**
 - * Successfully organized the first Model United Nations (MUN) event at the college, overseeing all logistical aspects and event execution.
 - * Led a team of volunteers, ensuring smooth coordination and communication for the success of multiple debate and quiz events.
- **Joint Secretary, Sports Club:**
 - * Played a key role in organizing PACE2k23, the annual sports fest, ensuring seamless coordination and event execution.
 - * Acted as a liaison between students, faculty, and sponsors to secure resources for events and promote sports culture.

PROJECTS

- **GeminiChat - AI-Powered Document Interaction Chat App:** Developed a sophisticated web application enabling users to interact with Google Gemini AI for document-based queries and content understanding.
 - Integrated Google Gemini AI for intelligent and context-aware responses to user queries.
 - Designed a responsive and user-friendly interface using React.js and Tailwind CSS for seamless user experience.
 - Implemented features for file uploads, text input, and dynamic chat interactions with robust state management.
- **Plant Disease Detection Application:** Built a web-based application to identify plant diseases using image analysis powered by the Plant.id API.
 - Integrated the Plant.id API to analyze images and deliver disease detection with confidence scores and treatment recommendations.
 - Developed an intuitive drag-and-drop image upload feature using React Dropzone.
 - Created a responsive multi-page interface with Tailwind CSS, including a Home, About, and Help section for user guidance.
- **Spotify Clone (MERN Stack with API Integration):** Designed and developed a music streaming platform inspired by Spotify, utilizing modern web technologies.
 - Implemented user authentication with React.js and Node.js for a secure login and account management experience.
 - Integrated third-party APIs to enable streaming and playback functionality.
 - Created a responsive and visually engaging UI with Tailwind CSS for intuitive music control and navigation.
- **ML-Based Story Generator (Hugging Face API Integration):** Designed an interactive platform that generates creative stories based on user input using advanced natural language processing techniques.
 - Integrated Hugging Face API for generating contextually relevant and imaginative stories.
 - Built a visually appealing and interactive frontend with React.js and Tailwind CSS.

- Designed intuitive input forms and output displays to enhance user engagement.
- **Prescripto - Doctor Appointment Booking System (MERN Stack):** Developed the frontend of a secure doctor appointment booking system with role-based access for patients, doctors, and administrators.
 - Created dynamic and responsive UI components using React.js and Tailwind CSS for efficient user interaction.
 - Integrated secure user authentication mechanisms for controlled access to sensitive data.
 - Designed appointment scheduling and management features for seamless coordination between patients and doctors.

PROGRAMMING SKILLS

- **Languages:** Python, Javascript, C++, SQL **Technologies:** MERN Stack (MongoDB, Express.js, React.js, Node.js), Firebase Authentication, Tailwind CSS, Mongoose, Machine Learning, API integration (Gemini, ChatGPT, Hugging Face)
